Feedbacks

Feed back from our first wire frame prototype:

Checkpoint 1 16-11-2023 🔒

Nawrocki, Mateusz M.K. 2 months ago

We made a first wireframe prototype for our cooking and recipes website and showed it to the teacher. We explained the main functionality of the home page and the subpages designed so far. In the feedback the teacher suggested that we should discuss more in depth what is the main value and the goal of our website and compare the various ideas with the core value that we agree on and think if the particular feature contributes positively towards this value. We should make more variations of the layout and try not to instantly stick with the first we made.

Feed back from our project plan:

Checkpoint 2 Projectplan and wireframes 22-11-2023 🔒

Hermans, Tobias T.L.J. 2 months ago

The feedback we got for the project plan is that we need to add a risk table and include reaserch paper in the appendix. We also have to remove the team charta from deliverables section. Also add some chapters in the project plan to make it more readable. For the wireframe we were told to add icons instead of text and decide on the color palette based on research.

Feed back from our group Retrispective:

Checkpoint 3 Retrospective 29-11-2023 🔒

Garzon Burbano, Brayan B.E. 2 months ago

the feedback we got for the group retrospctic, is that we are going in the right direction, and that we are ahead with the project. she also said that maybe we should keep working more on the demo/figma

Feed back from our paper prototype:

Checkpoint 4 Paper prototype (Chris) 04-12-2023 🔒

Nawrocki, Mateusz M.K. a month ago

We showed the teacher and a few of our fellow students the paper prototype of our project. On the very first iteration we got feedback from the teacher, which was based on how he experienced our prototype. Then, he suggested potential improvements. After implementing the improvements, which included content prioritization and more intuitive interaction experience, we showed the second iteration to a few of our colleagues and acted on their feedback as well. At the end of the day, we asked the teacher for the feedback once more and he was satisfied with the improvements that we made.

Feed back from our exercise presentatio:

Checkpoint 5 Presentation - Random Project 10-01-2024

Hermans, Tobias T.L.J. 8 days ago

The feedback we got is that we need to memorize the pitch more instead of ready it off of our phone. The pitch was intresting, easy to follow and fun to listen to.

> Describe what goes well according to your teacher, what you should pay more attention to and what is your next step to achieve the learning outcomes...
